Re: Implementation and full benefits of a Community Website for YOU

Dear owner,

The AGM has approved the setting up of a website devoted to the community of the owners of Hacienda Elviria. At this time of writing to you, work is already in process to agree the design and all the technical detail with the contractors.

There will be several benefits in having a website, but one of the most important is the **cost savings it can achieve**, particularly in communicating the call for the AGM and the sending out of the minutes of such meetings.

At present, this procedure involves preparing, copying and posting thousands of pages of paper all around the world to where owners reside. Clearly this is a costly exercise and an effect upon our environment regarding use of trees. The procedure also generates some unnecessary delay in the communication, merely because of the volume of work involved.

With the implementation of the website, your board believes that the same objective of informing you, can be achieved **WITHOUT** all the above mentioned disadvantages.

However, the new proposed procedures, of sending this information by electronic media (website & e-mail) needs your personal approval, as to which method you are willing to receive the information by, the old method of hard copy. or the new method of electronic website & email. We will then in future send such information by the means you have selected.

Could I urge you all, to take just a few minutes of your time to dispatch your selection below, to the adminstators, either by

It would be nice to receive 100% returns on this,
